Summary	I think you did an excellent job here with Dasmoto project. You got most of the design elements correct and it shows that you worked hard on it. One thing I would focus on is keeping your code organized and consistent on indents and spacing. This helps the readability of your code. Here's some articles I'd recommend for that. https://www.smashingmagazine.com/2008/11/12-principles-for-keeping-your-code-clean/ Tools like this help: https://dirtymarkup.com/ Great work!
